

Firmware Version 3.0.2

2GIG GC3 PANEL

RELEASE NOTES

This document details the new features and enhancements for the release of the 2GIG GC3 Panel Firmware Version 3.0.2. To download the firmware update, visit: <http://2gig.com/dealers/support-materials/firmware/>

Support for LTE Cell Radio

The GC3 panel now supports an LTE Cell Radio. The **2GIG-LTEV-A-GC3** works with Alarm.com on the Verizon network to providing the latest cell technology available. The patent-pending CellSled cell radio is easily replaced by a technician or even a home owner for easy upgrades.

Support for additional Z-Wave Devices

The GC3 firmware now supports the following additional ZWave devices

- GoControl Garage Door Controller – GD00Z-5
- Yale Lock Models – YRD 210, YRD220, YRD 240, YRL 220
- Schlage Lock Models – BE468, FE599
- AEON Labs DSC24-ZWUS, DSC06100ZWUS

System Pairing & Network Settings

- Two new features in the GC3 firmware have been added to support secondary touchscreens. System Pairing and Network Settings will be used to securely pair and connect upcoming touchscreens.

NOTE: Connecting to a WiFi network using Network Settings will allow connection to secondary touchscreens. It does not connect to Alarm.com

General Enhancements

- Improved Two-way Voice performance when switching between modes
- Eliminated beeps after firmware update completion
- Various system performance enhancements.
