

2GIG Garage Door Remote Module Discontinued

The 2GIG-brand 345 MHz Garage Door Remote Module has been discontinued (ref. 2GIG-GDR1-345).

The remaining inventory is limited to stock on hand, when the stock is sold out they will no longer be available.

An alternative to the 345 MHz 2GIG-GDR1-345, is the GoControl Z-Wave Garage Door Opener Remote Controller, model **GD00Z-4**, which operates using the 2GIG panel's Z-Wave automation communications.

The GoControl Garage Door Opener Remote Controller works with nearly all garage door openers, connected to a sectional garage door. The GD00Z-4 is supported by Alarm.com for the 2GIG GC2 panel, and is scheduled to be supported on the 2GIG GC3 panel late in 2016.

NOTE: Remember to update your system with this discontinued SKU.
