FAQs

Q. How does the 4G LTE cell radio benefit the customer?

A. The 4G LTE radio brings the latest technology for transferring both voice and data to the central station to ensure rapid communication. Installing the latest cellular technology helps to extend the life of the Customer's installation from other cellular technologies, whose protocols are beginning to sunset.

Q. Is my installation covered by 4G LTE?

A. Coverage can never be 100% guaranteed, but Verizon has aggressively rolled out the largest domestic LTE Network for both voice and data. Please use this link to check for coverage in your area:
